

In the Specification

On page 10, substitute paragraph 2 with the following:

The combined use at the above ratio of 65/35 ~ 90/10 is able to improve both surface intrinsic resistance ( $\Rightarrow$ ) ( $\Omega$ ) and total light transmittance (%) (refer to Embodiment 3 in the subsequent Embodiment) and, in particular, the combined use at the above ratio of 75/25 ~ 90/10 will improve the half life (second), total light transmittance (%) and turbidity (%) (refer to Embodiment 5 in the subsequent Embodiment).
